Every four seconds, another person is diagnosed with dementia. Among them is Sue Berghoff. She has Lewy Body Dementia (LBD) - one of the leading causes of dementia next to Alzheimer's and Parkinson's disease. There is no cure yet for this fatal disease. Sue is on a remarkable journey making something positive from her diagnosis. Join us for "Sue's Story," a documentary film, followed by a panel discussion and learn what's being done in our county to change things for the better.

### **Our Series Partners**

This series was made possible by a grant from the Morgan Hill Rotary Club, and donations raised by The Sue's Story Project through the *LBD Awareness & Research* subfund of the Morgan Hill Community Foundation.
